## **MPC Capital expands its management platform with the addition of a portfolio of energy-efficient container vessels**

- Addition of four 3,800 TEU container ships with a total volume of USD 180 million
- Expansion of Assets under Management in line with refined strategy
- Mid-term charter agreements increase visibility of recurring income

Hamburg, 2 October 2024 -- The investment and asset manager MPC Capital announces the addition of four highly efficient container vessels to its asset management platform. With a total volume of USD 180 million, the fleet contributes to the growth of MPC Capital's Assets under Management. This increases the basis for recurring management fees, which are the key component of MPC Capital's income streams.

With the presentation of the half-year financial report 2024, MPC Capital announced its strategic focus on Maritime and Energy Infrastructure with a strong emphasis on projects related to the energy transition. Due to their design and technical specifications, the container vessels now added to the Assets under Management are considerably more efficient and economical than the average of the comparable global fleet.

The four container ships, each with a capacity of 3,800 standard containers (TEU), were acquired by MPC Container Ships (MPCC), which was established by MPC Capital in 2017. MPC Capital holds a 14% cornerstone shareholding in MPCC as part of its co-investment strategy. Attractive medium-term charter agreements were secured for the vessels. This further increases the visibility and hence sustainability of recurring revenues and profits for MPC Capital.

Dr. Philipp Lauenstein, CFO of MPC Capital AG: "This portfolio of four highly efficient container vessels is a perfect addition to our recurring management business within our maritime infrastructure platform. It contributes to our key objectives of expanding our assets under management and further growing our recurring revenue base."

### **About MPC Capital AG ([www.mpc-capital.com](http://www.mpc-capital.com))**
